February 16, 2011

Evan Waxman MD, PhD  
203 Lothrop Street  
Pittsburgh, PA 15213

Dear Dr. Waxman,

Let me take a few minutes to introduce you to a very progressive, state of the art, practice and surgery center in Columbus, Nebraska.

We are a group of one ophthalmologist and six optometrists practicing primarily general ophthalmology and optometry. We practice from six locations within a 75 mile radius. Our primary clinic in Columbus is four years old and includes a new Zeiss fluorescein camera, Visante OCT, Cirrus OCT, Humphrey VF, Wave Scan Technology for Lasik and IOL Master for cataracts. We have access to mobile lasers for Intralase and Refractive procedures. Attached to our clinic we have a Surgery Center where we also have the Yag and Argon lasers. We have full service dispensaries in each location and are migrating to NextGen EPM, EHR, and Optix. Our practice includes a visiting Medical Retina physician from Omaha and a Pediatric Ophthalmologist from Lincoln.

In Columbus we have the benefit of living in a relatively quiet, small community but are only 75 minutes from major shopping in Omaha and 90 minutes from Epply Airport in Omaha. We have many diverse recreational activities for both children and adults and our public and parochial schools are strong in academics. We also include a community college campus here in Columbus.

We are looking for a progressive general ophthalmologist who has an interest in cataracts, glaucoma and refractive and would be interested in a buy-in opportunity to the practice. If you would like to learn more about our practice, please give me a call. I can be reached at 402-563-3686 or my cell phone is 402-276-2121. You can also visit our website at [www.eyephysicianspc.com](http://www.eyephysicianspc.com)

I look forward to hearing from you.

Sincerely,

Peter E. Diedrichsen, M.D.
