Re: Neuro-Ophthalmology/Orbit & Ophthalmic Plastic Surgery Fellowship

Dear Colleague:

The Department of Ophthalmology at UT Southwestern Medical Center has created a fellowship training program which for 2012 will begin on July 7th. I would appreciate your assistance in passing this information on to your residents.

The one-year fellowship program provides extensive exposure to medical and surgical management of neuro-ophthalmological, oculoplastics and orbital disorders in adults, adolescents and children. Surgical procedures performed by the fellow as primary surgeon include eyelid reconstruction, orbital surgery and neuro-ophthalmic surgery and strabismus. The fellow is typically involved in clinically-related research projects of specific focus and short duration.

The preceptors for this fellowship program are: Nick Hogan, M.D., Ph.D., Kamel Itani, M.D., Ray Jones, Jr., M.D., and Ron Mancini, M.D.

Interested residents should send a letter of interest, their CV and three letters of reference. While not required, we prefer one of the letters to be from a neuro-ophthalmologist, one from an oculoplastics surgeon, and one from either their Chair or Program Director. Applicants must be a U.S. Citizen/permanent resident and be eligible for Texas licensure.

All information should be mailed to Adriana Jenkins, Fellowship Coordinator, Department of Ophthalmology, UT Southwestern Medical Center, 5323 Harry Hines Blvd., Dallas, TX 75390-9057, or it can be sent via email to adriana.jenkins@utsouthwestern.edu.

I appreciate your assistance in passing this information on to your residents.

Sincerely,

James P. McCulley, M.D., FACS, FRCOphth (UK)
Professor and Chairman
The David Bruton, Jr. Chair in Ophthalmology
